

Empowering communities to build resilient and sustainable food systems

Introduction

The **Tadamon Accelerator for Food Security**, developed under the IsDB-ISFD NGO Empowerment for Poverty Reduction Program – TADAMON, is a thematic accelerator (capacity building and grant-giving) for civil society organisations (CSOs), centered around two thematic tracks arising from complex challenges in the OIC Member countries and answering the need to increase food security through: **Climate Smart Agriculture** and new **Emerging Technologies for Food Access and Utilizations**.

With its 11-week tailored curriculum (including engaging modules and sessions in SDG Impact Management, Impact Business Development, Innovative Financing and Agile Project Management), featuring expert-led training, personalized mentorship, and equity-free grants, the Tadamon Food Security Accelerator empowers changemakers to enhance and scale their innovations, fostering resilience, driving impact, and contributing to global food security and the 2030 Agenda for Sustainable Development.

Vision and Strategy

Our vision is to address food insecurity by empowering CSOs with innovative tools and strategies to build sustainable food systems. Through strategic partnerships and tailored support, we bring leaders and managers together and empower them to scale their impact and drive progress towards a more sustainable future.

What we provide?

Want to get involved? Our offer:

- **Training for the design** of incubation and/or acceleration programs, including existing ones, and support in their development and implementation.
- **Co-design and joint implementation** of national/regional/global innovation challenges and acceleration programs on various topics.
- **Training in specific topics** such as impact measurement and management, business model development, innovative financing etc., as part of a wider program curriculum.
- **(Co)management of direct & indirect donations and investments;** linking donations/investments with Islamic Finance (through platforms/members).
